SUMMARY

Software Engineering graduate (WGU, 2026) with prior experience as a Network and Systems Administrator in military and enterprise environments. Skilled in Java, Kotlin, Angular, and full-stack development, with a strong foundation in secure system design and database management. Proven ability to build scalable applications and apply modern development practices. Seeking a junior software developer role to leverage both development and infrastructure expertise.

TECHNICAL SKILLS

Languages: Java, Kotlin, Python, JavaScript, TypeScript, SQL HTML, CSS
Frameworks: Angular, React, Node.js, Express, Bootstrap
Developer Tools: Git, Docker, Firebase, PostgreSQL, MySQL, Android Studio, IntelliJ
Certifications: ITILv4, Project+, AWS Certified Cloud Practitioner

PROJECTS

- Pet Adoption & Volunteer Management App** | *Android, Java, Kotlin, Firebase* March 2026
- Built a full-stack mobile application to manage pet adoption listings and volunteer coordination workflows
 - Implemented role-based access control (RBAC) and Firestore security rules to prevent unauthorized data access
 - Applied input validation and error handling to ensure data integrity and improve user experience
 - Designed scalable architecture using object-oriented principles to support future feature expansion
- Interactive World Map Application** | *Angular, JavaScript, HTML, CSS* June 2025
- Developed an interactive SVG-based world map using Angular and external APIs for dynamic data visualization
 - Improved user engagement by enabling real-time interaction with geographic data
 - Utilized version control (Git) for efficient project collaboration and code management
- Data Analysis & Reporting System** | *PostgreSQL* January 2026
- Designed and optimized SQL queries, functions, triggers, and stored procedures for data reporting
 - Improved data retrieval efficiency and streamlined reporting workflows
 - Created structured report tables to support accurate and organized data analysis
- Island Tourism UX Project** | *UX Design, Prototyping, Usability Testing* June 2025
- Created wireframes, user personas, and interactive prototypes based on user-centered design principles
 - Conducted usability testing and implemented improvements based on user feedback
 - Delivered a refined design that improved usability and navigation flow
- State Government Website** | *HTML, CSS* November 2025
- Designed and developed a multi-page responsive website based on provided specifications
 - Created structured layouts and wireframes to ensure consistency and usability

EXPERIENCE

- Self-Paced Student & Volunteer** February 2013 – current
Career Break *Lashmeet, WV*
- Maintained continuous professional development in software engineering and IT through formal education and certifications
 - Volunteered with Crisis Text Line, providing real-time crisis intervention and communication support
 - Completed training in CPR and Emergency Shelter Operations for disaster response readiness
- PC Support & Systems Administrator** April 2010 – January 2013
Virginia Tech Library Systems Inc *Blacksburg, VA*
- Administered and maintained network infrastructure, ensuring system reliability and minimal downtime
 - Installed, configured, and supported Windows and Linux servers
 - Provided technical support and troubleshooting for hardware, software, and network issues
- Commercial Bank Teller** April 2008 – April 2010
Branch Banking & Trust *Princeton, WV*
- Managed high-volume financial transactions exceeding \$20K daily with 100% accuracy
- Network & Systems Administrator** March 2000 – March 2008
United States Air Force *Various locations*
- Deployed and maintained secure network systems in remote and high-pressure conditions
 - Ensured compliance with strict security protocols while maintaining TS-SCI clearance
 - Supported and maintained base-level web systems using HTML, CSS, and ColdFusion

EDUCATION

- Western Governors University** Salt Lake City, Utah
Bachelor of Science, Software Engineering April 2023 – March 2026
